Important notice:

This document may contain forward-looking statements. By their nature, forward-looking statements involve risk and uncertainty because they relate to future events and circumstances that may be beyond the Storebrand Group's control. As a result, the Storebrand Group's actual future financial condition, performance and results may differ materially from the plans, goals and expectations set forth in these forward-looking statements. Important factors that may cause such a difference for the Storebrand Group include, but are not limited to: (i) the macroeconomic development, (ii) change in the competitive climate, (iii) change in the regulatory environment and other government actions and (iv) market related risks such as changes in equity markets, interest rates and exchange rates, and the performance of financial markets generally. The Storebrand Group assumes no responsibility to update any of the forward-looking statements contained in this document or any other forward-looking statements it may make.

Storebrand Group

- Group result of NOK 546 million¹⁾ for the 1st quarter.
- Earnings growth within Savings
- Solvency margin of 175%

Storebrand's ambition is to be the best provider of pension savings. The Group offers a broad range of products within life insurance, property and casualty insurance, asset management and banking, to companies, public sector entities and private individuals. The Group is divided into the segments Savings, Insurance and Guaranteed Pension and Other.

Profit after tax	311	801	64	258	258	1,382

The Group profit before amortisation and reserve strengthening was NOK 546m³ (NOK 605m) in the 1st quarter. The figures in parentheses are from the corresponding period last year.

Total fee and administration income increased by 1.8 %⁴⁾ compared with the same period last year. Income is reduced within guaranteed pension products in long-term decline, however the reduction is compensated by income growth from savings and insurance. The

costs are developing in a stable manner compared to last year. Storebrand has an ambition to reduce costs by NOK 300-400m by the end of 2018. Strengthening competitiveness through continued efficiency improvements is a priority. Storebrand entered into a strategic partnership with Cognizant, which includes part-ownership of Storebrand Baltic UAB. The aim of this partnership is to establish a foundation for customer-centric development of the Group's IT solutions and enhance the efficiency of our operations.

¹⁾ Result before strengthening of longevity reserves, amortisation and taxes.

²⁾ The income statement is based on reported IFRS results for the individual group companies. The statement differs from the official accounts layout.

³⁾ The abbreviations NOK for Norwegian kroner, m for million, bn for billion and % for per cent are used throughout the report.

⁴⁾ Adjusted for positive foreign currency effects and discontinued business.

GROUP RESULT BY RESULT AREA

	2016	2015				Full year
(NOK million)	1Q	4Q	ЗQ	2Q	1Q	2015
Savings (non-guaranteed)	279	301	264	237	218	1,020
Insurance	122	17	120	192	159	488
Guaranteed pension	15	-110	20	183	236	329
Other	130	68	-133	-3	-8	-75
Group result before amortisation	546	275	272	610	605	1,762

The Savings segment reported a profit of NOK 279m for the 1st quarter (NOK 218m), adjusted for positive foreign currency effects during the quarter of 8.6%. The earnings growth was driven by increases in volume and transaction-based fees within Asset Management and the Unit Linked business in Norway.

The Insurance segment reported a profit of NOK 122m (NOK 159m). The combined risk result gives a claims ratio for the quarter of 77% (75%) and a combined ratio of 92% (90%).

The Guaranteed Pension segment reported a profit of NOK 15m (NOK 236m). The fall in interest rates during the quarter caused a negative impact on the Swedish business.

The financial performance in the Other segment of NOK 130m (NOK -8m) was marked by gains in connection with the sale of Storebrand Baltic UAB and good results in the company portfolios.

CAPITAL SITUATION AND TAXES

The Solvency II regulations were introduced on 1 January 2016. The Group's target solvency margin in accordance with the new regulations is minimum 130%, including use of the transitional rules. The

solvency margin for the Storebrand Group was calculated at 175% at the end of the 1st quarter. Without transitional rules, the solvency margin is estimated at 117%. Storebrand uses the standard model for the calculation of Solvency II. Lower interest rates in Norway and a change in the yield curve have had a negative impact on the Solvency II margin. Changes to the regulations, methods and interpretations may occur that could affect the Solvency II margin in the future.

Tax costs in the 1st quarter are estimated based on an expected effective tax rate for 2016. The effective tax rate is influenced by the fact that the Group has operations in countries with tax rates that are different from Norway (25%), and it varies from quarter to quarter depending on each legal entity's contribution to the Group result. The tax rate is calculated to be in the range of 19-23% before amortisation for the year.

STRENGTHENING RESERVES FOR INCREASED LONGEVITY

In the 4th quarter of 2015, Storebrand decided to charge the remaining estimated direct contribution to expected increased longevity. The remaining reserve strengthening is expected to be covered by the surplus return and loss of profit sharing.

MARKET AND SALES PERFORMANCE

Sales of savings products, loans and insurance products are good. Storebrand has been successful with the sale of retail market products to employees with an occupational pension from Storebrand. In Norway, Storebrand is the market leader in defined contribution schemes with 34% of the market share of gross premiums written.

SPP is the fifth largest actor in the Other Occupational Pensions segment with a market share of 11% measured by premium income from unit linked insurance¹⁾.

Savings

Earnings growth due to a higher volume

The Savings business area includes products for retirement savings with no interest rate guarantees. The area includes defined contribution pensions in Norway and Sweden, asset management and bank products to private individuals.

SAVINGS

	2016	2015				Full year
(NOK million)	1Q	4Q	ЗQ	2Q	1Q	2015
Fee and administration income	697	761	646	627	628	2,662
Risk result life and pension	-2	1	-5	4	-4	-3
Operating expenses	-412	-455	-381	-394	-408	-1,638
Financial result	0	0	0	0	0	0
Result before profit sharing and loan losses	283	307	261	238	216	1,022
Net profit sharing and loan losses	-4	-6	3	-0	2	-1
Result before amortisation	279	301	264	237	218	1,020

RESULTS

The Savings segment reported a result of NOK 279m for the 1st quarter (NOK 218m), which was equivalent to earnings growth of 30% from the same period last year.

Fees and administration income increased by 10% during the quarter compared to the same period last year. Income growth is driven by the customers' conversion from defined benefit to defined contribution pension schemes in combination with good sales and higher savings rates. In addition, volume growth and transaction-based fees in asset management contributed to growth. Increased competition contributes to a reduction in the net interest income in the Bank's retail market. For the quarter, net interest income was 1.20% of average total assets compared with 1.35 % for the same period last year.

Good cost control contributed to costs being at the same level as the 1st quarter of 2015.

BALANCE SHEET AND MARKET TRENDS

Premium income for non-guaranteed savings was NOK 3.7bn in the 1st quarter, an increase of 29% on the same period last year. Total reserves within unit linked insurance have increased by 12% over the last year and amounted to NOK 125bn at the end of the quarter. Assets under management in the Unit Linked business in Norway increased NOK 8.5bn (18%) relative to the 1st quarter of 2015. The growth is driven by premium payments for existing contracts, returns and conversion from defined benefit schemes. In Norway, Storebrand is the market leader in defined contribution schemes with 34% of the market share of gross premiums written.

In the Swedish market, SPP is the fifth largest actor in the Other Occupational Pensions segment with a market share of 11% measured by premium income from unit linked insurance. Turbulent equity markets and lower returns have contributed to a decline in the growth rate and from the 1st quarter of 2015, there was a reduction in customer assets of SEK 5bn.

Storebrand Asset Management's assets under management have increased by NOK 9bn from the 1st quarter last year to NOK 567bn. This growth was driven by sales and returns, as well as foreign exchange fluctuations.

The lending portfolio in the retail banking market is developing positively and grew by NOK 1.6bn from the end of the year and NOK 4.3bn from the 1st quarter of 2015. The portfolio primarily consists of low-risk home mortgages.

SAVINGS - KEY FIGURES

Retail lending	28,425	26,861	25,417	24,833	24,100

Insurance

Satisfactory margins, but lower growth

Insurance has responsibility for the Group's risk products in Norway and Sweden¹⁾. The unit provides health insurance in the Norwegian and Swedish corporate and retail markets, P&C insurance and personal risk products in the Norwegian retail market and employee-related and pension-related insurance in the Norwegian and Swedish corporate markets.

INSURANCE

	2016			Full year		
(NOK million)	1Q	4Q	ЗQ	2Q	1Q	2015
Insurance premiums f.o.a. ²⁾	947	934	894	947	867	3,642
Claims f.o.a. ²⁾	-728	-791	-697	-683	-652	-2,822
Operating expenses	-144	-151	-122	-136	-128	-538
Financial result	47	25	45	64	72	206
Result before amortisation	122	17	120	192	159	488
Claims ratio	77%	85%	78%	72%	75%	77%
Cost ratio	15%	16%	14%	15%	15%	15%
Combined ratio	92%	101%	92%	87%	90%	92%

RESULTS

Insurance delivered a profit before amortization of NOK 122m (NOK 159m) in the 1st quarter. The total combined ratio for the quarter was 92% (90%). Premium income increased 9% compared with the previous year.

The combined risk result gives a claims ratio of 77% (75%) and this is at the expected level for the quarter. P&C, private and personal insurance in particular contributed to the result, while defined contribution pensions were characterised by higher than expected claims during the period. The market for defined contribution pensions is very competitive and the price for disability pension is a key competition parameter. In addition, the unemployment and disability rates are showing a negative trend. An effort is being made to strengthen the profitability, including repricing for unprofitable customers. The underlying risk performance is still good in the P&C insurance portfolio, but claims inflation is increasing somewhat compared with previous quarters.

The cost percentage was 15% (15%) for the 1st quarter. This is at the expected level and the Insurance area has shown good cost control.

The investment portfolio of Insurance in Norway amounts to NOK 6.9bn, which is primarily invested in fixed income securities with a short or medium duration. The financial income shows a satisfactory return.

BALANCE SHEET AND MARKET TRENDS

Storebrand has been successful in the retail market, and the premium income increased by 18% in 2015, and during the quarter, premium income increased compared with the corresponding period in 2015. This growth is driven by competitive prices, and simple and relevant products, as well as good cover. The new agreement with Akademikerne (Federation of Norwegian Professional Associations), which entered into force in 2015, also ensures Storebrand of a solid position in the organisational market and sales of individual coverage to the Akademiker portfolio are an important impetus for continued growth. Health-related insurance is growing and Storebrand is succeeding well in this market.

For risk cover in connection with defined contribution pensions in Norway, future growth is expected to be driven by conversions from defined benefit to defined contribution pensions. The new disability pension regulations, which entered into force on 1 January 2016, will entail a somewhat lower premium volume in the future.

INSURANCE - KEY FIGURES

	2016	2015

* Individual life disability, property and casualty insurance. ** Group disability, workers comp. and health insurance. *** Defined contribution risk premium.

Guaranteed pension

Negative profit sharing result driven by development in the financial markets and historically low interest rates.

Guaranteed pensions consist of products encompassing long-term savings for pensions, where the customers have a guaranteed return or benefit on the saved funds. The area includes defined benefit pensions in Norway and Sweden, paid-up policies and individual capital and pension insurance.

GUARANTEED PENSION

	2016			Full year		
(NOK million)	1Q	4Q	3Q	2Q	1Q	2015
Fee and administration income	404	460	428	457	432	1,777
Risk result life & pensions	4	7	20	47	16	89
Operational cost	-271	-333	-266	-281	-277	-1,156
Financial result	-	-	-	-	-	-
Result before profit sharing and loan losses	137	134	182	223	171	711
Net profit sharing and loan losses	-122	-244	-162	-40	64	-382
Result before amortisation and longevity	15	-110	20	183	236	329
Provision longevity	-	-1,362	-96	-151	-154	-1,764

RESULTS

Fee and administration income has performed consistent with the fact that a large part of the portfolio is mature and in long-term decline. Income was NOK 404m (NOK 432m) for the 1st quarter, a reduction of 6.6% compared with the previous year. Operating expenses during the 1st quarter were in line with previous quarters, but lower than the previous quarter, which was affected by provisions for restructuring costs.

The risk result was NOK 4m (NOK 16m) for the 1st quarter and was generated in the Swedish business. In the Norwegian business, the risk result was zero for the quarter due to reserve strengthening based on the introduction of a new group disability pension and the general disability development in the population.

The result from net profit sharing is generated in the Swedish business and amounted to minus NOK 122m (NOK 64m) in the 1st quarter. The profit sharing result primarily consists of equity provisions for contracts without sufficient customer assets (deferred capital contribution - DCC), as well as profit sharing and indexing fees. The weak market performance in the equity and credit markets as well as falling interest rates mean that the assets do not develop at the same rate as liabilities. This has resulted in increased equity provisions for contracts without adequate returns during the quarter.

The Norwegian business is prioritising the build-up of buffers and reserves instead of profit sharing between customers and owners.

BALANCE SHEET AND MARKET TRENDS

The majority of products are closed for new business, and the customers' choices about transferring from guaranteed to non-guaranteed products are in line with the Group's strategy. As of the 1st quarter, customer reserves for guaranteed pensions amounted to NOK 266bn, which is the same level as at the start of the year. The total premium income for guaranteed pensions (excluding transfers) was NOK 2.7bn (NOK 3.3bn) in the 1st quarter, which corresponds to a reduction of 17%. Transfers out from the guaranteed pension were NOK 2.2bn (NOK 5.0bn) in the 1st quarter.

In the Norwegian business, paid-up policies were the only guaranteed portfolio experiencing growth and amounted to NOK 109.2bn as of the 1st quarter, which corresponds to an increase of NOK 5.4bn in

the quarter, which is equivalent to 5.2 per cent. From and including the 4th quarter of 2014, the customers were given an offer to convert from traditional paid-up policies to paid-up policies with investment options. Paid-up policies with investment options, which are included in the Savings segment, totalled NOK 4.6bn as of the 1st quarter, which was the same level as at the start of the year. The reserves for defined benefit pensions amounted to NOK 50.9bn at the end of the 1st quarter, a decrease of NOK 5.0bn since the end of 2015.

Guaranteed portfolios in the Swedish business totalled NOK 90.5bn, which corresponds to a decrease of NOK 1.2bn. Adjusted for foreign exchange fluctuations, there was a slight increase in the reserves during the quarter.

Other/Eliminations

The result for Storebrand ASA is reported under Other, as well as the result for the company portfolios and small subsidiaries of Storebrand Life Insurance and SPP. In addition, the results associated with lending to commercial enterprises by Storebrand Bank and the activities at BenCo are reported in this segment. Group eliminations are reported in a separate table below.

In the Other segment there was an underlying decrease in fee and administration income as a result of the discontinuation of the commercial bank.

The financial result for the Other segment includes the company portfolios of SPP and Storebrand Life Insurance, and the financial result of Storebrand ASA.

The announced sale of Storebrand Baltic UAB to Cognizant positively affected the financial result by approximately NOK 70m.

The Storebrand Life Insurance Group is funded by a combination of equity and subordinated loans. With the interest rate levels at the end of the 1st quarter of 2016, quarterly interest expenses of

approximately NOK 90m are expected. The company portfolios in the Norwegian and Swedish life insurance companies amounted to NOK 20.4bn at the end of the 1st quarter.

The investments are primarily in interest-bearing securities in Norway and Sweden with short maturities. The Norwegian company portfolio reported a return of 0.9% for the quarter. The Swedish company portfolio gave an overall return of 0,01% for the quarter.

Balance sheet, solidity and capital adequacy

Solvency margin of 175%

Continuous monitoring and active risk management is a core area of Storebrand's business. Risk and solidity are both followed up on at Group level and in the legal entities. Regulatory requirements for solvency and risk management follow the legal entities to a large extent. The section is thus divided up by legal entities.

STOREBRAND GROUP

The Solvency II margin in the Storebrand Group was 175% at the end of the 1st quarter, an increase of 7 percentage points during the quarter.

STOREBRAND ASA

Storebrand ASA held liquid assets of approximately NOK 2.6bn at the end of the quarter. Liquid assets consist primarily of short-term fixed income securities with a good credit rating. Storebrand ASA's total interest-bearing liabilities were NOK 3.3bn at the end of the quarter. This corresponds to a net debt-equity ratio of 3.7 %. A bond loan of NOK 555m matured on 5 April. The next maturity date for bond debt is in May 2016. In addition to the liquidity portfolio, the company has an unused credit facility of EUR 240m that runs until December 2019.

Storebrand has been governed by Solvency II since 1 February 2016 and will no longer report capital adequacy in accordance with the capital adequacy regulations.

Storebrand ASA owned 0.46% (2,062,721) of the company's treasury shares at the end of the quarter.

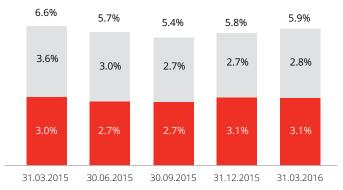

STOREBRAND LIVSFORSIKRING GROUP¹⁾

The solidity capital²⁾ amounted to NOK 60.5bn at the end of the 1st quarter, a reduction of NOK 0.6bn in the 1st quarter primarily as a result of lower customer buffers in the Swedish business and increased customer buffers in the Norwegian business.

STOREBRAND LIVSFORSIKRING AS

The market value adjustment reserve increased by NOK 0.2bn during the 1st quarter, and amounted to NOK 4.7bn at the end of the 1st quarter of 2016. The additional statutory reserves are unchanged in the quarter. The additional statutory reserves amounted to NOK 5.1bn at the end of the 1st quarter of 2016, and were essentially unchanged for the quarter. The excess value of held-to-maturity bonds valued at amortised cost increased by NOK 1.4bn in the 1st quarter and totalled NOK 12.0bn as of the 1st quarter. This increase was due to lower interest rates. The excess value of bonds at amortised cost is not included in the financial statements.

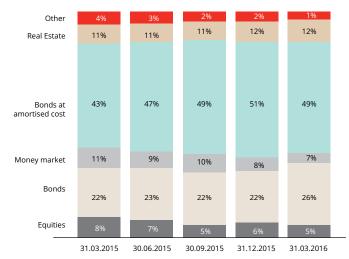

Additional statutory reserves in % of customer funds with guarantee

Market value adjustment reserve in % of customer funds with guarantee

ALLOCATION OF GUARANTEED CUSTOMER ASSETS

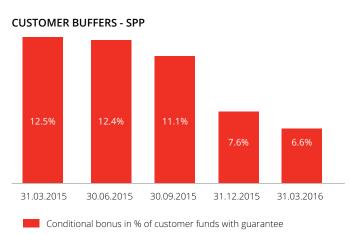

Customer assets increased by NOK 1.8bn in the 1st quarter due to positive returns. Customer assets totalled NOK 231bn at the end of the 1st quarter of 2016. Customer assets within non-guaranteed Savings increased NOK 1.4bn in the 1st quarter. Guaranteed customer assets increased NOK 0.4bn in the 1st quarter.

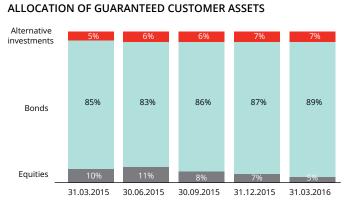

²⁾ Consists of equity, subordinated loan capital, market value adjustment reserve, risk equalisation reserve, unrealised gains/losses on bonds at amortised cost, additional statutory reserves, conditional bonuses and retained earnings.

¹⁾ Storebrand Life Insurance, SPP and BenCo.

The buffer capital amounted to NOK 5.4bn (NOK 9.6bn) in the 1st quarter. The decline is attributed primarily to the shift in the yield curve in the Swedish business and lower interest rates.

Total assets under management in SPP were NOK 166bn. This corresponds to an increase of 10% compared with the 1st quarter of 2015. For customer assets in non-guaranteed savings, assets under management totalled NOK 74.2bn as of the 1st quarter, which corresponds to an increase of 17% compared with the 1st quarter of 2015.

STOREBRAND BANK

The lending portfolio in the retail banking market increased by NOK 1.6bn in the 1st quarter, of which the bank has sold NOK 1.4bn to Storebrand Livsforsikring AS. The corporate market portfolio continues to shrink as planned.

The banking group's retail market portfolio totalled NOK 27bn, which is equivalent to 92% of the bank's total portfolio.

Gross lending to customers totalled NOK 29.3bn (NOK 29.4bn) at the end of the quarter. The volume syndicated to Storebrand Livsforsikring AS amounted to NOK 2.0bn (NOK 2.1bn) at the end of the quarter.

The bank has had stable risk-weighted assets during the quarter. The Storebrand Bank Group had a net capital base of NOK 2.6bn (NOK 2.6bn) at the end of the 1st quarter. The capital adequacy ratio was 17.3% and the core (tier 1) capital ratio was 15.4% at the end of the 1st quarter of 2016, compared with 17.1% and 15.2%, respectively, at the end of 2015.

Interim Report Storebrand Group 13

Outlook

REPORT OF OCCUPATIONAL PENSIONS IN THE PRIVATE SECTOR

The wage settlement between the Norwegian United Federation of Trade Unions (LO) and the Federation of Norwegian Industries (NHO) was concluded on 3 April 2016. To contribute to an agreement being reached between the parties, the Government has committed to examining occupational pensions in the private sector. This work will include:

- If employees should be entitled to establish a personal pension account with a pension provider selected by the employee.
- An employee's right to individual additional savings.
- Issues relating to managing of pensions when changing jobs.
- The age and income from which contributions should start and the duration of the employment required to be able to receive contributions.

NEW PUBLIC SERVICE PENSION

In December 2015, the Ministry of Labour and Social Affairs presented a report proposing amendments to occupational pensions in the public sector. A net scheme with all-years accrual, lifelong disbursements, flexible withdrawals and complete freedom to combine working and drawing of pension was proposed. The proposed solution may resemble a hybrid pension pursuant to the Occupational Pension Act, but appears considerably more complicated because gender neutrality is desired not only when concerning benefits but also for premiums. Based on the report, the Government has agreed with the trade unions that there are grounds for commencing a process. A mandate and schedule are now being prepared for the continued work on this process. It is expected that negotiations for a new public sector occupational pension scheme will commence during the course of the year.

SOLVENCY

The new European solvency regulations, Solvency II, entered into force on 1 January 2016 and will apply to all insurance companies in the EEA. Storebrand reports a solvency ratio based on the new rules of 175% (without the transitional rules the solvency margin is calculated at 117%). The regulatory minimum level is 100%. The solvency level shows that the Group is robust in relation to low interest rates for a long period of time. The investment strategy is adapted to the development of the insurance liabilities. The return is expected to exceed the risk-free interest and contribute to increased solvency over time. The development of interest rates, credit spreads, property and equity values affects the solvency margin. A gradual improvement is expected in the underlying solvency margin in the coming years. This is primarily due to strengthening of reserves for increased life expectancy and expected result achievement in the Group.

RISK

Trends in interest rate levels are deemed to be important risk factors that can affect the Group's results. Storebrand has adapted to the low interest rates through building up buffer capital, risk reduction

on the investment side and changes to the products. Over time, the level of the annual interest rate guarantee will be reduced. In the long term, enduring low interest rates will represent a risk for products with guaranteed interest rates running at a loss, and it is therefore important to deliver a return that exceeds the interest rate guarantee associated with the products. Storebrand has therefore adjusted its assets by building a robust portfolio with bonds at amortised cost to achieve the guaranteed interest rate. The performance of the property and equity markets is also considered a significant risk factor that affects the Group's results.

FINANCIAL PERFORMANCE

Storebrand is the market leader for the sale of pension solutions to Norwegian businesses. Defined contribution plans are the dominant solution for pension savings in Norway, The market for defined contribution pensions is growing and an increasing number of companies are choosing to increase pension savings for their employees. Storebrand also has a strong challenger role for the sale of pension solutions to Swedish businesses. Continued growth is expected in the Savings segment. Asset management is an important business area in this segment that contributes to growth.

Many businesses are choosing to convert existing defined benefit schemes to defined contribution schemes, which entails the issuance of paid-up policies that reduce the Group's earnings. Some of the companies choose to continue the defined benefit schemes for older employees, and the discontinuation of these schemes will therefore take place gradually over a longer period of time. The Guaranteed Pensions segment is in a long-term discontinuation process.

The loyalty programme for employees of companies who have a pension scheme with Storebrand contributes to growth in banking products and P&C insurance. Sales and advisory services for retail customers who are saving for a pension with Storebrand will be an important area of focus in the future. This contributes to expected growth within the Savings and Insurance segment.

The cost performance must be adapted to the earnings performance, and a target has been set that combined nominal costs shall be lower in 2018 compared with the level at the end of 2015. Storebrand will still make selected investments in growth. The partnership with Cognizant is expected to provide lower costs for the Group in the coming years. Cognizant will also contribute innovation and digital development that will provide better and more efficient customer service. There is margin pressure within the segments Savings and Insurance. Cost reductions and adaptations in the business will therefore establish a good foundation for profitable growth in the future.

Lysaker, 26 April 2016

Notes to the interim accounts Storebrand Group

Note 01

Accounting policies

The Group's interim financial statements include Storebrand ASA, subsidiaries, and associated companies. The financial statements are prepared in accordance with IAS 34 Interim Financial Reporting. The interim financial statements do not contain all the information that is required in full annual financial statements.

A description of the accounting policies applied in the preparation of the financial statements is provided in the 2015 annual report, and the interim financial statements are prepared with respect to these accounting policies.

There is none new or amended accounting standards that entered into effect as at 1 January 2016 that have caused significant effects on Storebrand's interim financial statements.

Note 02

Estimates

In preparing the Group's financial statements the management are required to make estimates, judgements and assumptions of uncertain amounts. The estimates and underlying assumptions are reviewed on an ongoing basis and are based on historical experience and expectations of future events and represent the management's best judgement at the time the financial statements were prepared.

Actual results may differ from these estimates

A description of the most critical estimates and judgements that can affect recognised amounts appears in the 2015 annual financial statements in note 2, strengthening longevity reserves for Storebrand Life Insurance in note 3, insurance risk in note 7, valuation of financial instruments at fair value is described in note 13 and in the interim financial statements note 12 Solvency II.

Note 03

Segments

Storebrand's operation include the business areas Savings, Insurance, Guaranteed Pension and Other.

Changes in segments

Storebrand has made minor changes to the segment reporting in 2015. Figures for previous periods have been restated, see the table with restated comparative figures at the bottom of the note.

Savings

Consists of products that include saving for retirement with no explicit interest rate guarantees. The area includes defined contribution pensions in Norway and Sweden, asset management and bank products to private individuals.

Insurance

Insurance is responsible for the group's risk products in Norway and Sweden. The unit provides treatment insurance in the Norwegian and Swedish corporate and retail markets, P&C insurance and personal risk products in the Norwegian retail market and employee- and pension-related insurances in the Norwegian and Swedish corporate market.

Guaranteed pension

Guaranteed pension consists of products that include long-term saving for retirement, where customers have a guaranteed return or performance of savings funds. The area includes defined contribution pensions in Norway and Sweden, paid-up policies and individual capital and pension insurances.

Other

Under the other category, the result from Storebrand ASA and the result from the company's portfolios in Storebrand Livsforsikring and SPP are reported. In addition, the results linked to lending to business activities in Storebrand Bank, the operation in BenCo and minority in securities' fund are included. The elimination of intra-group transactions that have been included in the other segments has also been included.

Reconciliation with the official profit and loss accounting

Results in the segments are reconciled with the corporate results before amortization and write-downs of intangible assets. The corporate profit and loss account includes gross income and gross costs linked to both the insurance customers and owners. In addition, the savings element is part of the premium income and in costs related to insurance. The various segments are to a large extent followed up in the follow-up of net profit margins, including follow-up of risk and administration results. The result lines that are used in segment reporting will therefore not be identical with the result lines in the corporate profit and loss account.

⁶⁾ The term solidity capital encompasses equity, subordinated loan capital, the risk equalisation fund, the market value adjustment reserve, additional statutory reserves, conditional bonuses, excess value/deficit related to bonds at amortised cost and accrued profit.

Note 04

Financial market risk and insurance risk

Risks are described in the annual report for 2015 in note 7 (Insurance risk), note 8 (Financial market risk), note 9 (Liquidity risk), note 10 (Lending and counterparty risk), note 11 (Credit exposure) and note 12 (Concentration of risk).

Market risk means changes in the value of assets as a result of unexpected volatility or changes in prices on the financial markets. It also refers to the risk that the value of the insurance liability develops differently to that of the assets.

The most significant market risks for Storebrand are share market risk, credit risk, property price risk, interest rate risk and currency exchange rate risk.

For the life insurance companies, the financial assets are invested in a variety of sub-portfolios. Market risk affects Storebrand's income and profit differently in the different portfolios. There are three main types of sub-portfolio: company portfolios, customer portfolios without a guarantee and customer portfolios with a guarantee.

The market risk in the company portfolios has a direct impact on Storebrand's profit, as does the market risk from the financial assets of Storebrand ASA and the subsidiaries that are not life insurance companies.

The market risk in customer portfolios without a guarantee is at the customers' risk and expense, meaning Storebrand is not directly affected by changes in value. Nevertheless, changes in value do affect Storebrand's profit indirectly. Income is based largely on the size of the reserves, while the costs tend to be fixed. Lower returns on the financial market than expected will therefore have a negative effect on Storebrand's income and profit.

For customer portfolios with a guarantee, the net risk for Storebrand will be lower than the gross market risk. The extent of measures to reduce risk depends on several factors, the most important being the size and flexibility of the customer buffers and level and duration of the return guarantee. If the investment return is not sufficiently high to meet the guaranteed interest rate, the shortfall will be met by using customer buffers in the form of risk capital built up from previous years' surpluses. Risk capital primarily consists of unrealised gains, additional statutory reserves and conditional bonuses. The owner is responsible for meeting any shortfall that cannot be covered. For guaranteed customer portfolios, the risk is affected by changes in the interest rate level. Falling interest rates are positive for the investment return in the short term due to price appreciation for bonds, but negative in the long term because it reduces the probability of achieving a return higher than the guarantee.

The equity market has been turbulent during the first quarter. In mid-February, most equity markets were down more than 10 per cent, however much of this fall was later reversed such that the global index fell 2 per cent in the first quarter. The credit market has experienced a similar trend with an increase and then subsequent decrease in credit spreads. Interest rates have fallen during the first quarter. The 10-year interest swap rate has fallen approximately 0.5 per cent in both Norway and Sweden. Short-term interest rates have also fallen, driven by new interest rate cuts by the central banks. Both the Norwegian and Swedish central bank rates were lowered to record-low levels during the first quarter and are currently at 0.5 per cent and minus 0.5 per cent, respectively.

The interest rate sensitivity (duration) of the investments has increased somewhat during the first quarter in both Norway and Sweden. Other than this, there have been minor changes in investment allocations.

For guaranteed portfolios in Norway, the return was positive in the first quarter, and adequate in relation to what has been used as the basis for the plan for the strengthening of reserves. Customer buffers (market value adjustment reserves, additional reserves) have also been strengthened somewhat. Lower interest rates have resulted in an increase in the excess value of bonds that are assessed at amortised cost. Guaranteed portfolios in Sweden have also had positive returns, but lower interest rates have resulted in the increased value of the liabilities being greater than the increased value of assets. This has given a negative financial result and a reduction in customer buffers (conditional bonus).

Insurance risk is the risk of higher than expected payments and/or an unfavourable change in the value of an insurance liability due to actual developments deviating from what was expected when premiums or provisions were calculated. Most of the insurance risk for the group is related to life insurance. Long life expectancy is the greatest risk because increased longevity means that the guaranteed benefits must be paid over a longer period. There are also risks related to disability and death.

The insurance risk is almost unchanged during the first quarter.

Note Liquidity risk

The loan agreements contain standard covenants. Storebrand is in compliance with all relevant covenants in 2016. Under the loan programme in Storebrand Boligkreditt AS the company's overcollateralisation requirement of 109.5 per cent was fulfilled.

Credit facilities

Storebrand ASA has an unused credit facility of EUR 240 million.

Facilities for Storebrand Boligkreditt AS

Storebrand Bank has two credit facilities with Storebrand Boligkreditt AS. One of these is an ordinary overdraft facility of up to NOK 6 billion. This has no fixed expiry date, but may be terminated by the bank with 15 months' notice. The other facility must at all times be sufficient to cover interest and principal on covered bonds and related derivatives for the next 12 months. The credit facility is not revocable by the bank until three months after the maturity of the longest covered bonds and related derivatives.

Note Valuation of financial instruments and investment properties

The Group categorises financial instruments valued at fair value on three different levels. Criteria for the categorisation and processes associated with valuing are described in more detail in note 13 in the financial statements for 2015.

The levels express the differing degrees of liquidity and different measurement methods used. The company has established valuation models to gather information from a wide range of well-informed sources with a view to minimising the uncertainty of valuations.

Loan commitment corporate market		44	
Total contingent liabilities	10,601	8,181	9,288

Guarantees principally concern payment guarantees and contract guarantees.

Unused credit facilities concern granted and unused overdrafts and credit cards, as well as unused facility for credit loans secured by property.

Storebrand Group companies are engaged in extensive activities in Norway and abroad and may become a party in legal disputes. Please also refer to note 2 and note 45 in the 2015 annual report.

Note 12

Solvency II

The Storebrand Group is an insurance-dominated, cross-sectoral financial group with capital requirements in accordance with Solvency II. Storebrand calculates Solvency II according to the standard method as defined in the Solvency II Regulations.

Solvency II entered into force on 1 January 2016. In accordance with the Solvency II regulations, the first complete Solvency II annual report for 2016 will be reported to the financial markets in the first 6 months of 2017.

Consolidation is carried out in accordance with Section 18-2 of the Norwegian Act relating to Financial Undertakings and Financial Groups. The solvency capital requirement and minimum capital requirement for the group are calculated in accordance with Section 46 (1)-(3) of the Solvency II Regulations using the standard method and include the effect of the transitional arrangement for shares pursuant to Section 58 of the Solvency II Regulations.

The models used as a basis for the calculation of capital requirements and solvency capital are based on a number of requirements and assumptions that are partly specified in the regulations and partly interpreted by Storebrand based on the regulations. The most important assumptions and estimates in the calculation relate to the risk-reducing capacity of deferred tax, future margins and reserve developments, as well as modelling of future developments in the financial markets. The assumptions and estimates are reviewed on an ongoing basis and are based on historical experience and expectations of future events and represent the management's best judgment at the time the financial statement were prepared. Changes to the regulations, methods and interpretations may be made that could affect the Solvency II margin in the future.

The solvency capital largely appears as net assets in the Solvency II balance sheet with the addition of eligible subordinated loans and deducted for own shares and ineligible minority interests. The solvency capital is therefore significantly different to book equity in the financial statements. Technical insurance reserves are calculated in accordance with the standard method and include the effect of the transitional arrangement pursuant to Section 56 (1) - (6) of the Solvency II Regulations. The transitional arrangement entails that the increase in the value of the technical insurance reserves is phased in gradually over a period of 16 years. The composition of solvency capital appears in the table below.

The solvency capital is divided into three capital groups in accordance with Section 6 of the Solvency II Regulations. Group 1 capital consists of paid-in capital and reconciliation reserve¹. It also includes perpetual subordinated loans (perpetual hybrid Tier 1 capital) with up to 20 per cent of Group 1 capital.

Other subordinated loans (time limited) and risk equalisation reserve are categorised as Group 2 capital. Group 2 capital can cover up to 50 per cent of the solvency capital requirement and up to 20 per cent of the minimum capital requirement. Eligible minority interests and deferred tax assets are categorised as Group 3 capital. Group 3 capital can cover up to 15 per cent of the solvency capital cannot be used to cover the minimum capital requirement.

Subordinated loans issued prior to 17 January 2015 are covered by a transitional arrangement that will continue until 2026 and during this period these loans will qualify as Group 1 capital despite them not fully satisfying the requirements for viable capital in the Solvency II regulations.

The companies in the group governed by CRD IV are included in the group's solvency capital and solvency capital requirements with their respective primary capital and capital requirements.

SOLVENCY CAPITAL

			31.3.2016

¹⁾ Profit earned that is included as equity in the financial statements must be replaced by the reconciliation reserve in the solvency balance. The reconciliation reserve also includes profit earned, but based on the valuation of assets and liabilities in the solvency balance. The reconciliation reserve will also include the present value of future profits. The value of future profits is implicitly included as a consequence of the valuation of the insurance liability.

31 3 2016

The capital requirement in Solvency II appears as the total of changes in solvency capital calculated under different types of stress, less diversification. The largest part of the capital requirement appears from financial market stress and particularly relates to changes in interest rates and falls in the equity markets, as well as increased credit spreads. There is also the insurance risk, for which the most important capital requirement comes from stress relating to the transfer of existing customers within defined contribution pensions. The solvency capital requirement appears in the table below.

SOLVENCY CAPITAL REQUIREMENTS AND - MARGIN

Minimum margin	411%
Minimum capital requirement	9,830

Note

Information about related parties

Storebrand conducts transactions with related parties as part of its normal business activities. These transactions take place on commercial terms. The terms for transactions with management and related parties are stipulated in notes 25 and 48 in the 2015 annual report.

Storebrand had not carried out any material transactions other than normal business transactions with related parties at the close of the 1st quarter 2016.

Notes to the financial statements Storebrand ASA

Note 01

Accounting policies

The financial statements are presented in accordance with the accounting policies applied in the annual financial statements for 2015. The accounting policies are described in the 2015 annual report. Storebrand ASA does not apply IFRS to the parent company's financial statements.

Estimates

In preparing the interim accounts, Storebrand has used assumptions and estimates that affect reported amounts of assets, liabilities, revenues, and costs, and information in the notes to the financial statements. The final values realised may differ from these estimates.

To the Board of Directors of Storebrand ASA

REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

We have reviewed the consolidated statement of financial position of Storebrand ASA (the Group) as of 31 March 2016, and the related income statement, the statement of comprehensive income, the statement of changes in equity, the statement of cash flow for the three-month period then ended and selected explanatory notes. Management is responsible for the preparation and presentation of this interim financial information in accordance with International Accounting Standard 34 "Interim Financial Reporting" as adopted by EU. Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim financial information for the Group is not prepared, in all material respects, in accordance with International Accounting Standard 34 "Interim Financial Reporting" as adopted by EU.

Oslo, 26 April 2016 Deloitte AS

Henrik Woxholt State Authorized Public Accountant (Norway)
