#### Strategy and future prospects

Through developing attractive products and digital services related to savings, secured and non-secured lending, the bank offers attractive customer value propositions to both attract and retain customers. Improving competitiveness through better efficiency is a priority and the bank will maintain cost control and increase the degree of automation in customer and work processes.

Sound management of the bank's credit and liquidity risk, and control of the operational risk in key work processes is a core priority. With the war in Ukraine and turbulent capital markets, both in Norway and internationally, the bank is paying extra close attention to the funding markets. Funding markets, interest rates, unemployment, and the property market, particularly in Oslo, are regarded as key risk factors that can affect the results of the Storebrand Bank Group.

Storebrand Bank's operational restrictions imposed by the pandemic have been lifted, and the company is combining key learnings from flexible working to establish a productive work environment to the benefit of both employees and customers.

The Board of Directors are not aware of any events of material importance to the preparation of the interim financial statements that have occurred since the balance sheet date.

The Storebrand Bank Group's definition of default is in line with the recommendation given by European Banking Authority's (EBA's) guide to implementing the default definition in accordance with Article 178 (EU Regulation 575/2013). The definition of default is applied at debtor level with absolute and relative thresholds for arrears/overdrafts. Arrears/overdraftsfor each individual commitment are measured in relation to the total debtor exposure. The absolute threshold is set at NOK 1,000 (per commitment), and the relative threshold is 1% of total debtor exposure. Joint commitments (commitments with several debtors) are defined as a separate risk point, and they are not included in the total exposure for the respective individual customers. Default occurs after 90 days with arrears/overdrafts above both absolute and relative thresholds. All debtor commitments are considered defaulted if default has occurred on at least one of them. In accordance with the guidelines, a probation period of 3 months is used. The probation period starts when default criteria are no longer in place. In order for the probation period to end, the arrears/overdrafts must be below the threshold values for the entire probation period.
